## FINDINGS, CONCLUSIONS AND DECISION

### FINDINGS:

1. The master list of Exhibits and Witnesses which is a part of this file and which exhibits were considered by the Examiner, is hereby made a part of this file, as if set forth in full herein.
2. The PDS staff report has correctly analyzed the nature of the application, the issues of concern, the application's consistency with adopted codes and policies and land use regulations, and the State Environmental Protection Act (SEPA) evaluation with its recommendation and conditions. This report is hereby adopted by the Examiner as if set forth in full herein.
3. There were no public comment letters.
4. The request is for a rezone from R-9,600 to R-7,200 and approval of a 10-lot subdivision using lot size averaging.
5. The site contains a residential building with accessory structures and is landscaped with grass.
6. Adjacent properties to the south and east are developed as subdivisions, while to the north the area is single-family residences. The surrounding zoning is R-9,600. To the west the property is undeveloped land with extensive critical areas.
7. The project would comply with park mitigation requirements under Chapter 30.66A SCC (Title 26A SCC) by the payment of \$1,244.49 for each new single-family home.
8. The DPW reviewed the request with regard to traffic mitigation and road design standards. This review covered Title 13 SCC and Chapter 30.66B SCC (Title 26B SCC) as to road system capacity, concurrency, inadequate road conditions, frontage improvements, access and circulation, and dedication/deeding of right-of-way, state highway impacts, impacts on other streets and roads, and Transportation Demand Management. As a result of this review, the DPW has determined that the development is concurrent and has no objection to the requests subject to various conditions. (See Pages 3-5, Exhibit 31)
9. School mitigation requirements under Chapter 30.66C SCC (Title 26C SCC) have been reviewed and set forth in the conditions.
10. There are no critical areas on the site.
11. Stormwater runoff shall be captured and routed to the detention system located within Tract 999. The PDS Engineering Division has reviewed the concept of the proposed grading and drainage and recommends approval of the project subject to conditions, which would be imposed during full detailed drainage plan review pursuant to Chapter 30.63A SCC (Title 24 SCC).
12. The Snohomish County Health District has no objection to this proposal provided that public water and sewer are furnished. Any existing on-site septic systems shall be abandoned.
13. Public water and sewer service will be available for this development as well as electrical power.

14. The property is designated Urban Low Density Residential (ULDR 4-6 du/ac) on the General Policy Plan (GPP) Future Land Use Map (FLUM) and is located within an Urban Growth Area (UGA). According to the GPP, the ULDR designation covers various subarea plan designations which would allow mostly detached housing developments on larger lot sizes. Land in this category may be developed at a density of 4-6 du/ac and one of the implementing zones is the R-7,200 zone which is the case here.
15. The request complies with the Snohomish County Subdivision Code, Chapter 30.41A SCC (Title 19 SCC) as well as the State Subdivision Code, RCW 58.17. The proposed plat complies with the established criteria therein and makes the appropriate provisions for public, health, safety and general welfare, for open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools and school grounds, and other planning features including safe walking conditions for students.
16. Chapter 30.42A covers rezoning requests and applies to site-specific rezone proposals that conform to the Comprehensive Plan. The decision criteria under SCC 30.42A.100 provides as follows:

The hearing examiner may approve a rezone only when all the following criteria are met:

- (1) the proposal is consistent with the comprehensive plan;
- (2) The proposal bears a substantial relationship to the public health, safety, and welfare; and
- (3) Where applicable, minimum zoning criteria found in Chapters 30.31A through 30.31F SCC are met.

It is the finding of the Examiner that the request meets these requirements generally and should be approved.

17. The proposal has been evaluated by PDS for compliance with the lot size averaging provisions of SCC 30.41A.240 and SCC 30.23.210. This proposal is consistent with these provisions.
18. The request is consistent with Section 30.70.100 SCC (Section 32.50.100 SCC), which requires, pursuant to RCW 36.70B.040, that all project permit applications be consistent with the GMACP, and GMA-based county codes.
19. The aerial photograph (Exhibit 9) very clearly and effectively shows the location of the proposal and how it would fit into the surrounding area.
20. Any Finding of Fact in this Report and Decision, which should be deemed a Conclusion, is hereby adopted as such.

## **CONCLUSIONS:**

1. The Examiner having fully reviewed the PDS staff report, hereby adopts said staff report as properly setting forth the issues, the land use requests, consistency with the existing regulations, policies, principles, conditions and their effect upon the request. It is therefore hereby adopted by the Examiner as a conclusion as if set forth in full herein, in order to avoid needless repetition. There are no changes to the recommendations of the staff report.
2. The Department of Public Works recommends that the request be approved as to traffic use subject to certain conditions.

3. The request is consistent with the GMACP; GMA-based County codes; and the type and character of land use permitted on the site and the permitted density with the applicable design and development standards.
4. The request is for a rezone and therefore must comply with Chapter 30.42A. This is a site specific rezone that conforms to the Comprehensive Plan and since no evidence was submitted contrary to the requirements of Chapter 30.42A, the evidence is presumed to meet these requirements.
5. The request will allow for the development of residential lots in a rapidly developing residential area of the county near Seattle Hill Road.
6. The request should be approved subject to compliance by the applicant with the following Conditions:

**CONDITIONS**

- A. The preliminary plat received by PDS on March 17, 2006, (Exhibit 11) shall be the approved plat configuration. SCC 30.42B.220 governs changes to the planned residential development official site plan; changes to the approved plat are governed by SCC 30.41A.330.
- B. Prior to initiation of any further site work; and/or prior to issuance of any development/construction permits by the county:
  - i. All site development work shall comply with the requirements of the plans and permits approved pursuant to Condition A, above.
- C. The following additional restrictions and/or items shall be indicated on the face of the final plat:
  - i. “The lots within this subdivision will be subject to school impact mitigation fees for the Everett School District No. 2 to be determined by the certified amount within the Base Fee Schedule in effect at the time of building permit application, and to be collected prior to building permit issuance, in accordance with the provisions of SCC 30.66C.010. Credit shall be given for 1 existing parcel. Lot 1 shall receive credit.”
  - ii. Chapter 30.66B SCC requires the new lot mitigation payments in the amounts shown below for each single-family residential building permit:  
  
\$1,946.54 per lot for mitigation of impacts on county roads paid to the county,  
\$68.17 per lot for transportation demand management paid to the county,  
  
The developer of this subdivision has elected to defer these payment obligations to a time preceding building permit issuance. Notice of these mitigation payment obligations shall be contained in any deeds involving this subdivision or the lots therein. Once building permit has been issued all mitigation payments shall be deemed paid.
  - iii. The developer shall pay the County \$1,244.49 per new dwelling unit as mitigation for parks and recreation impacts in accordance with Chapter 30.66A SCC; provided, however, the developer may elect to postpone payment of the mitigation requirement until issuance of a building permit for that lot. The election to postpone payment shall be noted by a covenant placed on the face of the recorded plat and included in the deed for each affected lot within the subdivision.
- D. Prior to recording of the final plat:

- i. Urban frontage improvements shall be constructed along the parcel's frontage on Seattle Hill Road to the specifications of the DPW.
- E. In conformity with applicable standards and timing requirements:
  - i. No requirements. Detention is in a buried vault.
- F. All development activity shall conform to the requirements of Chapter 30.63A SCC.

Nothing in this permit/approval excuses the applicant, owner, lessee, agent, successor or assigns from compliance with any other federal, state or local statutes, ordinances or regulations applicable to this project.

Preliminary plats which are approved by the county are valid for five (5) years from the date of approval and must be recorded within that time period unless an extension has been properly requested and granted pursuant to SCC 30.41A.300.

- 7. Any Conclusion in this Report and Decision, which should be deemed a Finding of Fact, is hereby adopted as such.
