FINDINGS, CONCLUSIONS AND DECISION

FINDINGS OF FACT

Based on all the evidence of record, the following findings of fact are entered.

1. The master list of exhibits and witnesses which is a part of this file and which exhibits were considered by the Examiner, is hereby made a part of this file as if set forth in full herein.
2. The PDS staff report has correctly analyzed the nature of the application, the issues of concern, the application's consistency with adopted codes and policies and land use regulations, and the State Environmental Policy Act (SEPA). That staff report is hereby adopted by the Examiner as if set forth in full herein.
3. The request is for a rezone of 3.12 acres from R-9,600 to R-7,200 in order to construct a 16-lot subdivision using lot size averaging. New average weekday vehicle trips are 124, of which 10 are a.m. peak hour trips and 13 are p.m. peak hour trips.
4. A temporary detention and water quality facility (Exhibit 15D) will be built to handle runoff from plat improvements other than dwellings. No dwellings are to be built until the detention/water quality facilities have been built for the plat of Sinclair Woods (PFN 05-128884 SD). Thereafter, the temporary facilities may be removed.
5. The project would comply with park mitigation requirements under Chapter 30.66A SCC by the payment of \$1,244.49 for each new single-family home.
6. The DPW reviewed the request with regard to traffic mitigation and road design standards. This review covered Title 13 SCC and Chapter 30.66B SCC as to road system capacity, concurrency, inadequate road conditions, frontage improvements, access and circulation, and dedication/deeding of right-of-way, state highway impacts, impacts on other streets and roads, and Transportation Demand Management. As a result of this review, the DPW has determined that the development is concurrent and has no objection to the requests subject to various conditions.
7. School mitigation requirements under Chapter 30.66C SCC have been reviewed and set forth in the conditions.
8. There are no critical areas on-site. An off-site Category 3 forested wetland is located approximately 50 feet south of the subject property. Urban Category 3 Wetlands have a standard 25 foot buffers; therefore, no impacts to the wetlands or the buffer will occur from the proposed development.
9. The PDS Engineering Division has reviewed the concept of the proposed grading and drainage and recommends approval of the project subject to conditions, which would be imposed during full detailed drainage plan review pursuant to Chapter 30.63A SCC.
10. The Snohomish County Health District has no objection to this proposal provided that public water and sewer are furnished. Public water and sewer service and electrical power will be available for this development.

11. The property is designated Urban Low Density Residential (ULDR 4-6 du/ac) on the General Policy Plan (GPP) Future Land Use Map (FLUM) and is located within an Urban Growth Area (UGA). Land in this category may be developed at a density of 4-6 du/ac and one of the implementing zones is the R-7,200 zone which is the case here.
12. The proposed use (single-family detached development) is essentially compatible with existing single-family detached developments on larger lots. Because the property is within a UGA, policies where adopted promote urban densities of development, a comparison with the present lower density character of much of the area is inappropriate since the present density of development in much of the surrounding area is inconsistent with both the adopted comprehensive plans and the present zoning.
13. The request complies with the Snohomish County Subdivision Code, Chapter 30.41A SCC as well as the State Subdivision Code, RCW 58.17. The proposed plat complies with the established criteria therein and makes the appropriate provisions for public, health, safety and general welfare, for open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools and school grounds, and other planning features including safe walking conditions for students.
14. Chapter 30.42A covers rezoning requests and applies to site-specific rezone proposals that conform to the Comprehensive Plan. The decision criteria under SCC 30.42A.100 provides as follows:

The hearing examiner may approve a rezone only when all the following criteria are met:

- (1) the proposal is consistent with the comprehensive plan;
- (2) the proposal bears a substantial relationship to the public health, safety, and welfare; and
- (3) where applicable, minimum zoning criteria found in Chapters 30.31A through 30.31F SCC are met.

It is the finding of the Examiner that the request meets these requirements generally and should be approved.

15. The proposal has been evaluated by PDS for compliance with the lot size averaging provisions of SCC 30.41A.240 and SCC 30.23.210. This proposal is consistent with these provisions.
16. The request is consistent with Section 30.70.100 SCC (Section 32.50.100 SCC), which requires, pursuant to RCW 36.70B.040, that all project permit applications be consistent with the GMACP, and GMA-based county codes.
17. Any finding of fact in this decision which should be deemed a conclusion is hereby adopted as such.

CONCLUSIONS OF LAW

Based on the findings of fact entered above, the following conclusions of law are entered.

1. The Examiner having fully reviewed the PDS staff report, hereby adopts said staff report as properly setting forth the issues, the land use requests, consistency with the existing regulations, policies, principles, conditions and their effect upon the request. It is therefore hereby adopted by the Examiner as a conclusion as if set forth in full herein, in order to avoid needless repetition. There are no changes to the recommendations of the staff report.

2. The Department of Public Works recommends that the request be approved as to traffic use subject to conditions specified below herein.
3. The request is consistent with the (1) GMACP, GMA-based County codes, (2) the type and character of land use permitted on the site, (3) the permitted density, and(4) the applicable design and development standards.
4. The request is for a rezone and therefore must comply with Chapter 30.42A. This is a site specific rezone that conforms to the Comprehensive Plan. Because no evidence was submitted of non-compliance with the requirements of Chapter 30.42A, the application is presumed to meet those requirements.
5. The request complies with the Snohomish County Subdivision Code, Chapter 30.41A SCC (Title 19 SCC) as well as the State Subdivision Code, RCW 58.17. The proposed subdivision complies with the established criteria therein and makes the appropriate provisions for public, health, safety and general welfare, for open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools and school grounds, and other planning features including safe walking conditions for students.
6. The conclusions of law immediately above herein are entered with awareness of the public concerns expressed in this record. However, the higher density infill in lieu of sprawl implements the applicable law and policies.
7. Any conclusion in this decision which should be deemed a finding of fact is hereby adopted as such.

DECISION

Based on the findings of fact and conclusions of law entered above, the decision of the Hearing Examiner on the application is as follows:
