The Snohomish County Medical Examiner's Office has identified the skeletal remains found on May 16th, 2016 near Quil Ceda Boulevard and 116th Street NE in Tulalip, Washington. The decedent is **Tyler R. Sullivan** of Seattle, WA. Sullivan was 27 -years-old when he disappeared from Seattle in October 2013. The cause and manner of death are both undetermined. Identification was accomplished by Barbara Rae-Venter and her Firebird Forensics Team using genetic genealogy.

Cause of Death

Cause of Death is a term used to indicate the medical cause of death, listing the disease(s) or injuries that caused death. Specific cause of death information is recorded on the death certificate and is entered into the Vital Statistics System of the State of Washington.

Manner of Death

Manner of Death is the way to categorize death as required by the Washington State Department of Health. The classifications are Natural, Accident, Suicide, Homicide, Undetermined, and Pending. Only medical examiners and coroners may certify non-natural deaths.

Natural is defined for Medical Examiner death certification purposes as a death due solely to an illness or medical issue not influenced by external factors.

Accident is defined for Medical Examiner death certification purposes as an unnatural death resulting from an inadvertent chance happening.

Suicide is defined for Medical Examiner death certification purposes as a death from self-inflicted injury with evidence of intent to die.

Homicide is defined as the action of one person directly causing the death of another. All murders are homicides, not all homicides are murder. An example may be an unintentional firearms-related hunting death.

Undetermined is for cases that have very little available information about the circumstances surrounding death (e.g., partial skeletal remains) or where known information equally supports, or conflicts with, more than one manner of death.

Pending is a temporary designation for cause and/or manner when additional investigation, information and/or test results are required for certification. Pending is generally amended as soon as additional information becomes available.

*A full explanation of Cause and Manner can be found in our [Annual Report](#).

Many individuals and agencies were involved in solving this case. Special thanks to genetic genealogists Barbara Rae-Venter and Junel Davidsen, the Tulalip Tribal Police, the FBI, forensic artist Natalie Murry, the Washington State Patrol Missing and Unidentified Persons Unit (MUPU), the King County Medical Examiner's Office, NamUs and the University of North Texas, DNA Solutions, GEDmatch, and Gene By Gene.
