## 2012 Property Tax Information

**EVERETT** – The 2012 average tax change was a decrease of \$105.02 countywide for the average residence. The decreases in taxes were mainly due to taxing districts reaching the limit on their levy rate or retiring bonds.

Countywide the assessed value of the average residence decreased from \$276,000 for taxes payable in 2011 to \$241,600 for taxes payable in 2012, according to Snohomish County Assessor Cindy Portmann. The average residential property assessed value decreased 12.5% in 2011.

According to the County Treasurer Kirke Sievers, the Treasurer's Office will begin mailing tax statements on Feb. 17<sup>th</sup> and most property owners should receive their statements by the following week. Property tax payment information for 2012 is also available on-line at the Treasurer's website:

<http://www1.co.snohomish.wa.us/Departments/Treasurer/>

The average percent tax change ranged from a 5% increase in the Town of Index to a decrease of 16.3% in the City of Snohomish for residential properties.

Snohomish County voters continued to show their support for the majority of taxing districts that requested approval of tax increases in 2011. Those increases will appear on their 2012 property tax statements. Voters approved 7 of 10 monetary property tax measures on the ballot in 2011. All 7 of the property tax measures approved were for various city and fire district levies.

Property taxes to be collected this year by all taxing districts in Snohomish County will show an overall decrease of 12.8 million or 1.33% less than last year.

The total value decreased from \$85.7 billion in taxable assessed value in 2011 to \$76.6 billion in taxable assessed value in 2012.

The levy rates calculated for taxing districts generally increased as a result of lower assessed values unless they reached their levy rate limit. The typical levy rate in 2011 was \$11.2105 per thousand dollars of assessed value. The 2012 typical levy rate increased to \$12.3720.

Taxing districts whose levies reached their limit saw a reduction of collectible taxes from the previous year. There were 41 taxing districts levies for 2012 taxes that were affected as a result of decreased assessed values. For more information on how property tax levies are calculated visit the assessor's website at:  
<http://assessor.snoco.org/divisions/levy.aspx>

There are several tax relief programs available that are administered by the Assessor's office. Information about the senior citizen and disabled persons exemption can be found on the back side of property tax statements or by visiting the Assessor's office website at: <http://assessor.snoco.org/>

**END**

## INCREASE/DECREASE IN PROPERTY TAXES

Increases in property taxes are due to:

- voter approved measures (typically 42-47% of the tax bill)
- new exemptions on property – shifting taxes to others
- taxing districts increasing their budgets by the 1% allowed by law or by taking banked levy capacity
- assessed value of a particular property increasing at a higher percent than other properties in the area
- annexations

Decreases in property taxes are due to:

- taxing districts hitting their statutory or maximum levy limits
- taxing districts retirement of a bond
- taxing districts reducing their budget or levy from the previous year
- property formerly exempt from property tax becomes taxable
- taxing districts failed attempts to renew a levy
- assessed value of a particular property increasing less or decreasing more than other property in the area
- annexations
