

Notice of SEPA Threshold Determination Swamp Creek Bridge 503 Replacement

Project Description:

Snohomish County Public Works (PW) proposes to replace the existing Swamp Creek Bridge 503 to meet current standards and provide facilities for all users including bicycles and pedestrians. The existing bridge has been determined to be structurally deficient, functionally obsolete and scour critical.

Bridge 503 carries Locust Way across Swamp Creek, east of Brier. The existing bridge is a 41-foot concrete tub girder design and will be replaced with a 70-foot span concrete girder design. The existing bridge is 22.5 feet wide. The new bridge will be 44 feet wide, accommodating two 11-foot driving lanes, two 5-foot bike lanes, and two 6-foot sidewalks.

Additional right of way acquisition, and temporary construction easements will be needed for this project. The project will provide stormwater flow control and quality treatment with a bioretention facility. A new waterline will be installed within the road construction limits by Alderwood Water and Wastewater District.

Project Location: The project is located on Locust Way north of 228th St. SW within Section 26, Township 27 North, Range 4 East W.M. of unincorporated Snohomish County.

The project is scheduled for construction in summer 2024.

State Environmental Policy Act (SEPA) Decision:

On September 14, 2022, Snohomish County Public Works determined that this project does not have a probable, significant adverse impact on the environment and has issued a Determination of Non-Significance (DNS). An environmental impact statement (EIS) under RCW 43.21C.030(2)(c) is not required. This decision was made after review of SEPA documents and other information on file with this agency. These documents can be viewed on the county's website: www.snohomishcountywa.gov/4116.

Project Name: Swamp Creek Bridge 503 Replacement
Project Number: RC 1420
