

Notice of SEPA Threshold Determination Jordan Creek Bridge #214 Replacement

Project Description:

Snohomish County Public Works proposes to replace Jordan Creek Bridge #214, which crosses Jordan Creek on Jordan Road. The existing bridge is a two-lane timber trestle bridge, 21-foot wide and approximately 107-feet in length. It is supported by creosote-treated timber piles and has a timber deck. The bridge is functionally obsolete and structurally deficient. It is currently load limited and reduced to operate with one 16-foot lane. The new single span girder bridge will be 120-feet long and will have two 11-foot wide travel lanes and 6-foot shoulders. Vehicular traffic will be detoured around the site during construction.

A new stormwater conveyance system and infiltration pond is proposed to meet the stormwater requirements of flow control and water quality. New right-of-way acquisitions are required for the proposed roadway and stormwater facility improvements, and to accommodate onsite compensatory mitigation for unavoidable impacts to critical area buffers.

The proposed project is located on Jordan Road between 143rd Ave NE and the 155th Ave NE, southeast of the City of Arlington, in Section 2, Township 31 North, Range 6 East. The project is scheduled for construction in summer of 2024.

State Environmental Policy Act (SEPA) Decision:

On September 21, 2022, Snohomish County Public Works determined that this project does not have a probable, significant adverse impact on the environment and has issued a Determination of Non-Significance (DNS). An environmental impact statement (EIS) under RCW 43.21C.030(2)(c) is not required. This decision was made after review of SEPA documents and other information on file with this agency. These documents can be viewed on the county's website: www.snohomishcountywa.gov/4117.

Project Name: Jordan Creek Bridge #214 Replacement
