**What: Mystery Solved! Identification of “Stilly Doe” through DNA Genealogy**

In 1980, a body was found along the Stillaguamish River in the City of Arlington. Forty-two years later, the person was identified, and the remains were returned to the family. The person had been born in the 19<sup>th</sup> Century and lived in Western Washington. Come hear the first-hand account of this mystery that took over four decades to solve from those who cracked it. And learn what it means to the family to finally know what happened to their long-lost relative.
