

## SNOHOMISH COUNTY PUBLIC WORKS

# You may see surveyors along 140th St NE

Snohomish County Public Works is in the very early stages of a road improvement project for 140th St NE between 23rd Avenue NE and 29th Avenue NE. You may see staff members in the area surveying the right-of-way and gathering other information needed for preliminary design concepts.

At this time we are considering adding turn lanes, shoulders and a traffic signal at 23rd Avenue NE. Bridge 582 over Quilceda Creek will likely be replaced at the same time.

Funds are currently available for only the design phase of the project. Construction funds may not be available for several more years. Once there is a completed design, however, the project will be in a better position to receive additional funding as it becomes available.

Updates will be posted on the project webpage. If you would like to receive an e-mail when new information and opportunities for comment become available, follow the e-subscribe link on the project webpage. Go to [www.snoco.org](http://www.snoco.org) - and search 140th St NE, or call 425-388-3789 and we can sign you up. *Thank you.*
