Snohomish County Public Works will be returning a 1,300 foot strip of Monte Cristo Grade Road, that is no longer in use, to its natural habitat. This project is part of Snohomish County’s effort to mitigate the environmental impacts of the retrofitting of Blue Bridge 538 that occurred in 2013.

Mitigation includes removing gravel and road material and replacing it with mulch and wood chips to support plant growth. Hundreds of native plants will be planted in the area and logs will be placed to support animal habitat.

**Construction Schedule**
- Construction will begin on July 25 and is targeted to be completed in September 2016.
- Workers will return in October 2016 to plant native vegetation.
- Hours of operation for the construction crew are approximately Monday through Friday from 7:30 a.m. to 7:00 p.m.

**Impact on Surrounding Area**
- Large trucks and operating equipment will be traveling through the area.
- No road closures are expected.

If you have questions, please contact us via email at ROAD@snoco.org or call 425-388-ROAD (7626).
