Subject: FW: SEPA comment for point wells

Ryan,
For Snohomish County's consideration. If I'm here when the next round of public comments is due, I'll resubmit. But just in case I'm sending it now.
Sincerely,

Rachael Markle

Subject: SEPA comment for point wells

Via my WRIA participation I have learned how artificial light on the water at night leads to greater predation of juvenile salmon (since they can be seen by predators by night as well as by day). I am concerned that point wells development will increase this. Can we comment on that for SEPA?
