Subject: comments on impact of Point Wells on Richmond Beach Road

Good afternoon,

I live along Richmond Beach Road. I would like to propose some safeguards for the residents who will breathe the fumes of 11,000 cars each day. I am saddened by the fact that my quality of life will be lessened by the development of Points Wells.

Think about these issues:

pollution that will harm the people that live along the road

noise pollution...use the pavement that absorbs sound,

put up noise guards/walls? along the road, more police on traffic control, motorcycles,(huge noise polluters) etc so that the recreational vehicles during the summer along the road is controlled.

Wider sidewalks for safety of residents

I never guessed that when I moved to Shoreline, I would have to worry about a huge development adding 11,000 trips per day, 50 feet from my backyard. I ... my health, my hearing, my sanity, will be impaired by the additional traffic noise, including emergency vehicles, the pollution and the effect on the human body. My quality of life will be diminished by this development.
