Leaders,

My house is the closest to the project that has Legal Access to the Beach. In the last 20 years I have become aware of how many species of sea and bird life use this relatively private beach in nurturing their young. I'm sure you care about this essential use of the beach but wonder if anything can be done to preserve this "semi-sanctuary"?

Development of the Point Wells Site will effect a lot more than people. Please do your best!

Thank you,
Rod Madden
