---

I concur with the County's decision to deny the Developer's request to once again extend the life of the Point Wells Development.

Because the Developer has not used previous extensions to bring the scope of the Point Wells Development in-line with the County's regulations for managing the impact, land development has on the local and extended area environment, as well as the social impact, I urge you to not issue an extension to the Point Wells Development project.

Building what is in essentially a small city (with skyscrapers) on the door steps of others, and perpetrated only for money, and without visiting every aspect of its footprint's impact, and without attempting to reach an equitable solution, is an affront to justice for all of us .

Thank You,  
Leslie Funderburg  
Woodway, Resident
