---

Dear Hearing Examiner,

The proposed project at Pt. Wells would be a huge impact on my day-to-day life. I live in Richmond Beach and take the Richmond Beach Road for most activities away from home including medical appointments, shopping, visiting family and more. The increased traffic caused by the proposed traffic would make most trips from home much more time consuming and use far more gas.

The increase in cars on Richmond Beach Road would affect the environment by causing increased pollution from automobile exhausts. This would affect the health and quality of life.

As a member of the Duwamish Tribe, I value the spaces left without development. There was at one time a Duwamish Village near the site of the proposed project. It would be best if nature can continue to exist there and not alter the deep soil left from our ancestors.

The location of the site is a natural setting for a wildlife habitat. It would be best for Snohomish County to determine the area a wetland for people to visit and enjoy nature.

Thank you for taking the time to read my concerns. I am unable to attend the hearing and speak in person. Thank you for this opportunity.

Respectfully,  
Edith Loyer Nelson
