

Notice of Land Disturbing Activity and SEPA Threshold Determination Little Bear Creek Advance Mitigation Site

Project Description:

Snohomish County Public Works (SCPW) proposes to construct and operate a 17-acre advance wetland mitigation site located south of 238th Street SE near its intersection with 58th Avenue SE. SCPW would restore the site and improve the functions and values of the wetlands and streams so that the site generates mitigation credits that can be used to offset unavoidable impacts of future road improvement projects. This project will require an LDA permit. Approximately 4,800 cubic yards of fill were placed on the site in the areas investigated, much of which will be removed or relocated as part of the mitigation project. Site work including grading, planting and other activities to install onsite mitigation would begin in 2020 pending regulatory approval and funding availability.

State Environmental Policy Act (SEPA) Decision:

On March 29 2019, Public Works determined that this project does not have a probable, significant adverse impact on the environment and has issued a Determination of Non-significance (DNS). An environmental impact statement (EIS) under RCW 43.21C.030(2)(c) is not required. This decision was made after review of SEPA documents and other information on file with this agency. These documents are available for public review upon request.

For SEPA DNS projects:

This DNS may be appealed pursuant to the requirements of SCC 30.61.300 and Chapter 2.02 SCC.

Project Name: Little Bear Creek Advance Mitigation Site
Project Number: RC 1730
Lead Agency: Snohomish County Public Works
