**Project Name:** Sauk Prairie Road Culvert Replacement Project  
**Project Number:** RC7879  
**Project Description:** Snohomish County is proposing to replace a culvert on Sauk Prairie Road half a mile east of the intersection with Crawford Loop Road. The larger culvert will carry flow from a stream and a pond associated with a wetland on the south side of the road, and eliminate flooding on the road during periods of high precipitation. A 600-foot section of the roadway will be raised up to 3 feet higher to accommodate the culvert. There will also be impacts to streams and wetlands and their buffers on both sides of the road. Excavation is estimated at 85 cubic yards, and fill at 2,119 cubic yards. Construction is scheduled for Summer, 2018 and duration is estimated at 6 weeks. A traffic detour will be implemented as it will be necessary to close the road.  
**Project Location:** The project site is located on Sauk Prairie Road, approximately 3.2 miles northeast of the town of Darrington, in SE 1/4, NE 1/4, Section 8, Township 32N, Range 10E, W.M.  
**Type of Project:** Culvert Replacement  
**Permits/Approvals Required:** Land Disturbing Activity Permit and other applicable federal, state and local permits.  
**SEPA Decision:** On April 21, 2017, Public Works determined that this project does not have a probable, significant adverse impact on the environment and has issued a Determination of Non-significance (DNS). An environmental impact statement (EIS) under RCW 43.21C.030(2)(c) is not required. This decision was made after review of a completed environmental checklist and other information on file with this agency.
