

# **SNOHOMISH COUNTY JOB DESCRIPTION**

## **BUSINESS APPLICATIONS DEVELOPER 4 - DIS**

Spec No. 3350

### **BASIC FUNCTION**

The Business Applications Developer 4 - DIS is responsible for programming, code analysis, project management, product evaluation, interface design, workflow, quality assurance and change management of assigned application projects for clients. A person in this position applies advanced knowledge and skills in multiple integrated specialties to provide creative, practical solutions. The position regularly represents a specialty area on a variety of teams, effectively applying working knowledge of project management. Acts independently with an understanding of strategic critical thinking, and communicates effectively. This work is performed at the enterprise level.

### **STATEMENT OF ESSENTIAL JOB DUTIES**

1. Applies advanced knowledge and skills in multiple integrated specialties with proficiency in all job functions related to application and software development, databases and electronic records.
2. Provides creative, practical solutions, consulting with higher level staff as needed, in a wide range of complex problems that affect a large number of users, require a large amount of resources, are of long duration and/or high risk; and designs/creates programs, data structures and reports in the area of application development.
3. Regularly represents specialty area on a variety of teams; mentors, directs, leads or supervises staff at 1-2 levels below; leads small groups; and is able to shape significant positive change in work correlated with application and software development, databases and electronic records.
4. Effectively applies a working knowledge of project planning, management and methodologies in projects that incorporate application and software development, databases and electronic records.
5. Acts independently, with understanding of complex issues, consequences for a large number of users, impact of using a large amount of resources, short and long term implications, and/or potentially high risk. Exercises considerable judgment in determining objectives of assignments.
6. Demonstrates understanding of advanced, rigorous thinking skills on complex issues. Displays an awareness of how to analyze, prioritize, abandon prejudices and previous ideas, and apply practical considerations. Handles assignments across multiple specialties and in roles associated with the area of application development.
7. Communicates effectively with others by developing and presenting material in written, verbal and graphic format about complex issues about application development.
