About the LSA & AHAR

The Longitudinal Systems Analysis (LSA) is the new name for the data and report generated through Stella in HUD’s HDX 2.0 site. The LSA data is used to create the Annual Homeless Assessment Report (AHAR) that goes to congress.

Every year, the U.S. Department of Housing and Urban Development (HUD) submits an Annual Homeless Assessment Report (AHAR) to the United States Congress. The AHAR is a national-level report that provides information about homeless service providers, people and households experiencing homelessness, and various characteristics of that population. It informs strategic planning for federal, state, and local initiatives designed to prevent and end homelessness.

HUD selected a research team from Abt Associates and the University of Pennsylvania to complete the AHAR. The AHAR research team collects, reviews, and analyzes HMIS data that Continuums of Care (CoCs) report to HUD via the HDX 2.0. The team supports CoCs throughout the data collection and cleaning process to review the data and resolve any data quality flags. Once the data collection and cleaning process has closed, the research team analyzes the data and prepares the annual reports, which have historically been published each summer/fall and provide an overview of homelessness during the previous year.

What data is reported

The LSA data provided by CoC’s contains community-level information on people and households during the reporting year. For those people and households served during the reporting period the LSA includes:

- Demographic information such as age, race, gender and veteran status.
- Length of time homeless and patterns of system use.
- Information of specific populations whose needs and/or eligibility for services may differ from the broader homeless population.
- Housing outcomes for those who exited the homeless services system.

The LSA is one of three aggregated data submissions that is used to create the AHAR report. These three submissions include the LSA, Point-in-Time (PIT) counts, and the Housing Inventory Count (HIC). For more information about the LSA please visit [https://www.hudexchange.info/homelessness-assistance/lsa/](https://www.hudexchange.info/homelessness-assistance/lsa/).

System Performance by Household Type

Households Served and Days Homeless by Household Type
Number of households served in ES, SH and TH projects, and in RRH or PSH projects before move-in and average cumulative days homeless by household type.

- Adult Only: 107 DAYS
- Adult & Child: 95 DAYS
- Child Only: 63 DAYS

2,204 HH

Exits by Household Type
Percent of households that exited to permanent destinations.

Exits to Permanent Destinations Trend
Number of households that exited from the homeless system and percent that exited to permanent destinations within each of the past three years.

- **2016**: 1,757 HH exited, 35% exited to permanent destinations.
- **2017**: 1,579 HH exited, 35% exited to permanent destinations.
- **2018**: 1,481 HH exited, 39% exited to permanent destinations.

Returns to the Homeless System Trend
Percent of households that returned to the homeless system within six months of exiting to a permanent destination within each of the past three years. For the current report period, the universe for the chart is households that exited within the first six months of the report period.

- **2016**: 617 HH exited, 8% returned after exits to permanent destinations (50 of 617 HH).
- **2017**: 552 HH exited, 7% returned after exits to permanent destinations (40 of 552 HH).
- **2018**: 259 HH exited, 9% returned after exits to permanent destinations (23 of 259 HH).
System Performance Map

Households use different combinations of project types during the time they are served in the homeless system. These project type combinations are referred to as pathways. Each pathway has different average cumulative days homeless, exits to permanent housing and returns to the homeless system. The system map shows performance for the main project types in the homeless system and can be filtered to show performance for the main pathways.
