How to view 2019 FEMA flood hazard data layer in Snohomish County’s PDS Map Portal

1. Navigate to the Snohomish County Planning & Development Services Map Portal, found at https://snohomishcountywa.gov/3752/
2. Click the image. The page may take several moments to load, followed by an overlay of a Terms and Conditions page.
3. If you agree to the Terms and Conditions, click “I Agree” to proceed.

If you agree to the Terms and Conditions, click “I Agree” to proceed.
4. You should see a default base map, similar to what is shown below.

5. Next, select “Change Map Layers” in the upper toolbar as shown.
6. Click on the Down arrow indicated in red below, next to the “Home” text field. This will generate a dropdown menu and allow you to select different layers. Select the “Critical Areas” item from the dropdown.

7. Scroll Down the List to find the check box next to “Critical Areas” and select it. The box should display a blue checkmark to show it is active.
8. Next, click the “+” icon to the left of the Critical Areas text indicated in red below.

9. Now select the checkbox next to the “2019 Preliminary FEMA Flood Hazard data” category.
