Update: Snohomish County Crews Continues Snow Removal Efforts after Yesterday's Record Snowfall

Online resources include snow removal and priority route maps for plows and deicers

EVERETT, Wash., February 14, 2021 – The US National Weather Service posted on social media that yesterday was recorded as the most snow in a single day since 1965 in the area. Snohomish County Road Maintenance crews are continuing to clear snow from roads since starting Friday night. As of 7 a.m. today; crews have plowed the equivalent of 7,200 miles of roads. So far, 375 tons of sand, 1,600 tons of sand/salt mix and 15,026 gallons of anti-icer have been used. Crews will continue to plow, sand and deice until temperatures rise and conditions return to normal.

Before heading out today or during a snow or ice event, it is highly recommended that commuters check their travel routes and options. For those venturing through unincorporated Snohomish County, visit the Public Works [Snow and Ice webpage](#) for road closure information and more. The new [snow removal and anti-icing map](#) shows which routes are primary and secondary and allows residents to see what county roads have been recently plowed, sanded or had anti-icing applied.

The prioritization of snow and ice routes are based on traffic volume, transit and school bus routes, terrain, and knowledge of problem areas. The prioritization does not change based on public calls – even multiple calls – requesting service.

During snow/ice weather events, it's also important to:

- Know who to call and when:
 - Life-threatening emergencies, call 911.
 - [Non-life threatening emergencies](#): 425-407-3999
- Snohomish County Road closure/plowing: 425-388-7500
 - Work requests for road plowing will be recorded but will not impact the priority listing during snow and ice events.
- Give snowplows and deicer equipment plenty of room to work. Allow for a minimum following distance of 200 feet.

- If you must pass, take extreme caution and beware of the displaced snow and ice, or sand spray.
- Vehicles parked along all major arterials and emergency routes must be moved off the street. Those vehicles left in the travel lane of a roadway and blocking traffic may be towed at the owner's expense. It is recommended for vehicles to be moved when snow is in the forecast. Parking vehicles in the driveway and off the road helps the snowplows finish routes more quickly and efficiently.
- Residents clearing driveways and snow berms are advised to pile the snow to the left side as you face the house, especially closer to the road. This prevents the snowplow blade from pushing the material back into the driveway. Throwing snow onto the road creates obstructions in the roadway and can be hazardous.
- Keep drainage inlets near your home clear of leaves and debris during the winter months to help reduce the chance of flooding.
- Try to keep garbage bins and other obstacles out of the street when the roads are icy or covered with snow.
- Obey road closed signs.
- Be sure to have vehicles mechanically prepared for cold weather. Have tire chains or traction tires readily available.
- Keep food, water and medical supplies in your home that will last at least one week. Pay attention to weather reports and plan ahead for even longer periods of time.
