Project Description:
Snohomish County Public Works (PW) proposes to upgrade the intersection of 84th Street NE and 163rd Avenue NE in unincorporated Snohomish County. Approximately 11,400 vehicles enter the intersection daily, and 10% of collisions along the corridor occur at the intersection.

The proposed project would construct a roundabout at the intersection to improve traffic flow and safety. The roundabout would have a 55-foot diameter center island, 15-foot-wide inside truck apron and a 20-foot circulating roadway. Outside truck aprons would be added to the NE, NW and SW edges of the circulating lane to accommodate long combination hauling vehicles.

The approach lanes would be 12 feet wide with chicanes designed to reduce approach speeds of approaching vehicles. Shared use concrete sidewalks (10-feet wide with a 2-foot buffer strip) would be used by both bicycles and pedestrians. The number of lanes would remain the same, but the intersection would be realigned and slightly raised to provide drainage.

State Environmental Policy Act (SEPA) Decision:
On May 18, 2021, the Department of Public Works determined that this project does not have a probable, significant adverse impact on the environment and has issued a Determination of Non-significance (DNS). An environmental impact statement (EIS) under RCW 43.21C.030(2)(c) is not required. This decision was made after review of a completed SEPA Environmental Checklist and other information on file with this agency. These documents are available for public review upon request.
