WATER QUALITY AQUATIC INVASIVE PLANT FUNDING AGREEMENT

BETWEEN

THE STATE OF WASHINGTON DEPARTMENT OF ECOLOGY

AND

SNOHOMISH COUNTY – CONSERVATION & NATURAL RESOURCES DEPARTMENT

This is a binding Agreement entered into by and between the state of Washington, Department of Ecology, hereinafter referred to as “ECOLOGY,” and Snohomish County – Conservation & Natural Resources Department, hereinafter referred to as the “RECIPIENT,” to carry out with the provided funds activities described herein.

GENERAL INFORMATION

Project Title:	Lake Roesiger Integrated Aquatic Vegetation Management Plan
Total Cost:	\$47,000.00
Total Eligible Cost:	\$40,000.00
Ecology Share:	\$30,000.00
Recipient Share:	\$10,000.00
The Effective Date of this Agreement is:	07/01/2021
The Expiration Date of this Agreement is no later than:	06/30/2023
Project Type:	Integrated Aquatic Vegetation Management Plan

Project Short Description:

The Lake Roesiger Integrated Aquatic Vegetation Management Plan (IAVMP) will provide the community with a road map to control the invasive aquatic plants affecting the lake’s health and recreational suitability. The plan will focus on Eurasian watermilfoil and fragrant water lily but will also address slender arrowhead, purple loosestrife and yellow flag iris.

Project Long Description:

The Lake Roesiger IAVMP will be a community-driven effort to identify and select the best options to control and prevent the spread of invasive aquatic plants. The lake suffers from infestations of five noxious weeds. Three are class B noxious weeds: Eurasian watermilfoil (EWM), slender arrowhead, and purple loosestrife. Two are class C weeds: fragrant waterlily and yellow flag iris. Collectively, these plants threaten the recreational use and the ecological health of Roesiger and present high risk of spread to nearby lakes.

Agreement No: WQAIP-2022-SnCoPW-00038
Project Title: Lake Roesiger Integrated Aquatic Vegetation Management Plan
Recipient Name: Snohomish County – Conservation & Natural Resources Department

Roesiger is a significant regional resource as it a destination for fishing, swimming, boating, water skiing and aesthetic enjoyment. Located 7 miles east of Lake Stevens, the lake is 348 acres, the 3rd largest lake in the county. The lake’s popularity means there is a high risk for spread of invasive species to other lakes. Within 7 miles, there are 6 other waterbodies with public access lakes.

Overall Goal:

The overall goal for Lake Roesiger is to dramatically reduce the populations of invasive aquatic plants with a focus on EWM and fragrant water lily. These actions will help to restore beneficial uses of the lake, improve habitat for fish and aquatic life and maintain the lakes good water quality. Secondary goals are to have an educated community of lake residents and users to prevent the spread of aquatic invasives to and from Lake Roesiger.

The IAVMP will be a roadmap for the County and the community to implement long-term control activities benefiting lake health. The activities of plant mapping, researching control methods, and identifying appropriate recommendations will ensure an effective plan. Extensive community input including a steering committee, community survey, and frequent outreach will ensure the plan is accepted by the community for long-term implementation.
